In response to applicant's amendment dated July 13, 2007. The following action is taken:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5-8 are, drawn to a holographic recording medium having a filter region to receive only the non-collimated light beam, classified in class 369, subclass 103.
- II. Claims 12-14 are, drawn to a holographic recording medium having a first and second region reflecting layer, classified in class 369, subclass 275.4.

Inventions group one and group two are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination group one has separate utility such as a medium which does not require the use of a reflecting layer with a first and second regions. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to

Art Unit: 2627

provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Newly submitted claims 12-14 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: see above

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 12-14 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Please cancel non-elected claims --1-4 and 9-14--.

Authorization for this examiner's amendment was given in a telephone interview with David Carlson on July 24, 2007.

Any inquiry concerning this communication should be directed to NABIL Z. HINDI at telephone number (571) 272-7618.
